Chaljub E., D. Komatitsch, J-P. Vilotte, Y. Capdeville, B. Valette and G. Festa (2007). Spectral-element analysis in seismology. In: Wu R.S. and V. Maupin (Eds), Advances in Wave Propagation in Heterogeneous Media. Advances in geophysics, vol. 48, Elsevier, pp.365-419

Cotton F., F. Scherbaum, J. Bommer, H. Bungum (2005). Criteria for selecting and adjusting ground-motion modes for specific target regions: application to central Europe and rock sites. Journal of seismology, Vol 7, 052267, 2005.

Douglas, J., H. Aochi, P. Suhadolc and G. Costa (2007). The importance of crustal structure in explaining the observed uncertainties in ground motion estimation. Bulletin of Earthquake Engineering, 5(1), 17-26.

Drouet, S., Chevrot, S., Cotton, F. and Souriau, A., 2007 : Simultaneous inversion of source spectra, attenuation parameters and site responses. Application to the data of the French Accelerometric Network. Bull. Seism. Soc. Am. (accepted).

Drouet S., A. Souriau and F. Cotton (2005). Attenuation, seismic moments and site effects for weak-motion events: application to the Pyrenees. Bull. Seism. Soc. Am., 95, 1731-1748.

Ferretti G., M. Massa, L. Isella, and C. Eva (2007). Site-Amplification Effects Based on Teleseismic Wave Analysis: The Case of the Pellice Valley, Piedmont, Italy. Bull. Seis. Soc. Am., Vol. 97.2.

Furlanetto E., G. Costa, F. Palmieri and P. Suhadolc (2006). Structure of the alluvial fan in Gemona (NE Italy) estimated by microgravimetric data modeling. Tectonophysics (submitted).

Furlanetto E., G. Costa, P. Suhadolc, F. Palmieri (2006) Gravimetric characterization of the Gemona (NE Italy) alluvial fan for site estimation. Journal of Geodesy (submitted).

Gosar A. (2007a). Microtremor HVSR study for assessing site effects in the Bovec basin (NW Slovenia) related to 1998 Mw5.6 and 2004 Mw5.2 earthquakes. Engineering geology (in press)

Gosar A. (2007b) Site effects study in shallow glaciofluvial basin using H/V spectral ratios from ambient noise and earthquake data; the case of Bovec basin (NW Slovenia). Journal of Earthquake Engineering (in press)

Gueguen P., C. Cornou, S. Garambois and J. Banton (2007). On the limitation of the H/V spectral ration using seismic noise as an exploitation tool : application to the Grenoble valley (France), a small apex ration basin. Pure appll. Geophys. 167, 115-134.

Roten, D. and D. Fäh (2006). A combined inversion of Rayleigh wave dispersion and 2D resonance frequencies. Geophysical J. Int., 168, 1261-1275.

Comptes rendus de congrès internationaux

Aochi H., J. Rey and J. Douglas (2006). Numerical Simulation of Wave Propagation in the Grenoble Basin. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°32 (Vol 1).

Barnaba C., F. Palmieri, A. Vuan and E. Priolo (2006). Geophysical exploration and seismic response int the Tagliamento alpine valley (NE Italy). 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°102 (Vol 2).

Bonilla L.F., P.C. Liu and S. Nielsen (2006). 1D and 2D linear and nonlinear site response in the Grenoble area. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°82 (Vol 1).

Causse M., F. Cotton and C. Cornou (2006). A ground-motion simulation approach coupling rock groundmotion prediction equations and the empirical Green's functions method. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°27 (Vol 1).

Cauzzi C., C. Eva, G. Ferretti, V. Giraud and R. Paolucci, Seismic response of alpine valleys: the case of Val Pellice, Italy. First European Conference on Earthquake Engineering and Seismology, 3-8 September 2006, Geneva, Switzerland, paper n°636.

Chaljub E. (2006). Spectral Element modeling of 3D wave propagation in the alpine valley of Grenoble, France. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper S04 (Vol 2).

Chaljub E., C. Cornou and P.-Y. Bard (2006). Numerical benchmark of 3D ground motion simulation in the valley of Grenoble, French Alps. France. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper SB1 (Vol 2).

Costa G., L. Moratto, D. Sandron, A. Delise and P. Suhadolc (2006). Ground motion attenuation and shaking maps generation in the southern Alps area. First European Conference on Earthquake Engineering and Seismology, 3-8 September 2006, Geneva, Switzerland, paper n°1811.

Costa G., P. Suhadolc, A. Delise, L. Moratto, E. Furlanetto and F. Fitzko (2006). Estimation of Site Effects at Some Stations of the Friuli (NE Italy) Accelerometric Network (RAF). 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°89 (Vol 2).

Douglas, J., H. Aochi, P. Suhadolc and G. Costa (2005). The importance of crustal structure in explaining the observed uncertainties in ground motion estimation. Proceedings of Earthquake Engineering in the 21st Century (EE-21C), 2005.

Douglas J., H. Aochi, P. Suhadolc and G. Costa (2006). On the applicability of one dimensional crustal structures for ground motion simulation. First European Conference on Earthquake Engineering and Seismology, 3-8 September 2006, Geneva, Switzerland, Paper n° 18.

Douglas J., P. Gueguen, E. Chaljub, F. Cotton, P. Suhadolc, G. Costa, D. Faeh, E. Spühler, A. Gosar, E. Priolo, C. Barnaba, R. Paolucci, C. Cauzzi and C. Eva (2006). Dissemination of Alpine Accelerometric Data. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°31 (Vol 1).

Douglas, J., P. Gueguen, E. Chaljub, F. Cotton, P. Suhadolc, G. Costa, D. Faeh, E. Spühle, A. Gosar, E. Priolo, C. Barnaba, R. Paolucci, C. Cauzzi, C. Eva. (2006). Alpine Accelerometric Database. CD-ROM, Projet Interreg 3B, Sismovalp.

Gueguen P., S. Garambois, S. Tadenuma, B. Lebrun, and F. Cotton (2006). Geotechnical, geophysical and seismological data used for the estimate of the highest amplified frequency in the basin of Grenoble. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°100 (Vol 2).

Jerram J., P. Foray, S. Labanieh and E. Flavigny (2006). Characterising the nonlinearities of lacustrine clays in the Grenoble basin. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°81 (Vol 1).

Lacave C. and F. Hollender (2006). Ground motion simulation on a 2D profile across the Grenoble basin using the Aki-Larner discrete wave-number method. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°14 (Vol 1).

Lacave C. and F. Lemeille (2006). Seismic hazard and alpine valley response analysis: generic valley configuration. First European Conference on Earthquake Engineering and Seismology, 3-8 September 2006, Geneva, Switzerland, paper n°1.

Lacave, C., F. Lemeille, P. Guéguen, E. Priolo, C. Barnaba, A. Vuan, G. Costa, A. Gosar, P. Suhadolc, D. Fäh, D. Roten, P. Tissières, S. Tadenuma, P.-Y. Bard, F. Cotton, C. Eva, V. Giraud, R. Paolucci, F. Bonilla, P. Foray, J. Jerram. (2006). Generic Alpine Valley characterization. CD-ROM, Projet Interreg 3B, Sismovalp.

Paolucci R. and D. Spinelli (2006). WAVE2D: a computer program for SH seismic wave propagation in heterogeneous media by the Fourier pseudo-spectral method. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°43 (Vol 1).

Paolucci R. and L. Morstabilini (2006). Non-dimensional site amplification functions for basin edge effects on seismic ground motion. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°41 (Vol 1).

Roten D., D. Faeh and D. Giardini (2006). Site effects in the Rhône valley analysed from ambient noise, local earthquakes and numerical simulations. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°92 (Vol 1).

Roten D., D. Fäh, I. Oprsal, K. Olsen and D. Giardini (2006). Analysis of deep valley response by ambient noise, earthquake records and numerical simulations, First European Conference on Earthquake Engineering and Seismology. Geneva, Switzerland, 3-8 September 2006, paper number 1108.

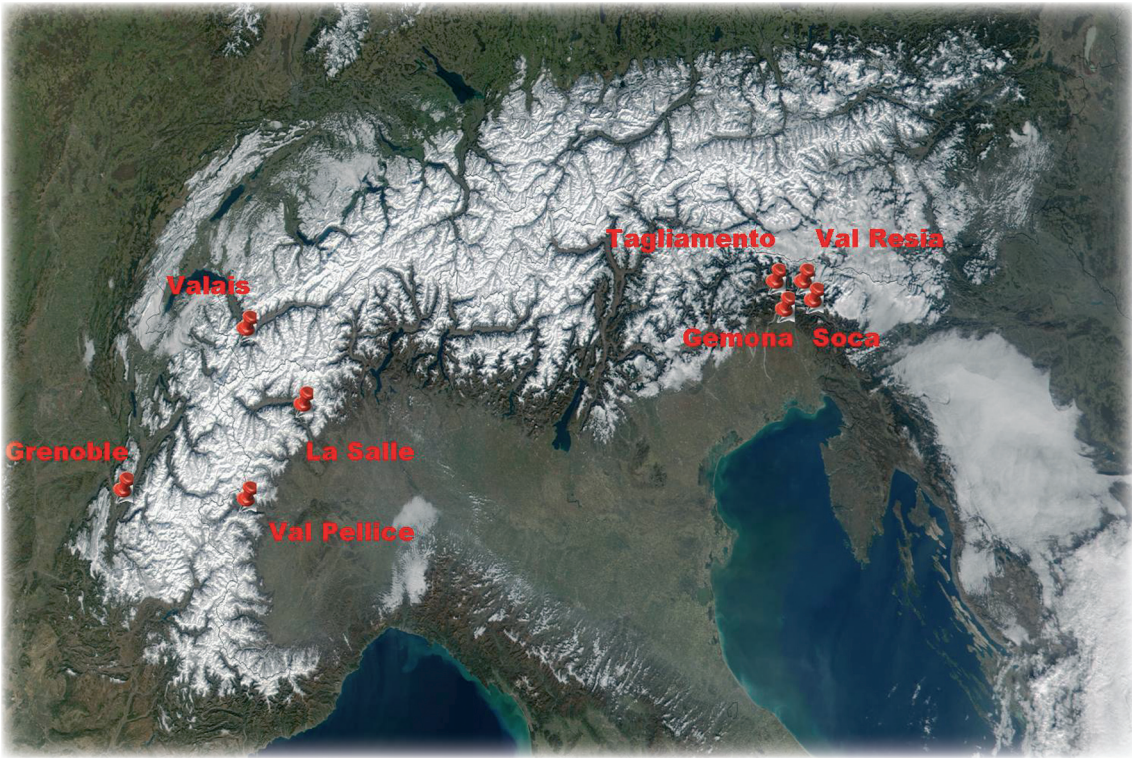

Turino C., G. Ferretti, C. Eva, C. Cauzzi, R. Paolucci (2006) Seismic Response analysis of La Salle fluvial fan, Valle D'Aosta, Italy. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°79 (Vol 2).

Vanini M., M. Villani, E. Faccioli and A. Gosar (2006). Modelling of strong ground motion of the July 2004 , Mw 5.2 earthquake in Krn mountains. 3rd International Symposium on the Effects of Surface Geology on Seismic Motion. Grenoble, France, 30 August-1 September 2006, LCPC, paper n°xx (Vol 2).
